

## LIFE SAFETY & SECURITY

**Smart Security. Safe Environments.**

In today's world, protecting people, property, and operations is more critical than ever. Life safety and security are foundational to the success and resilience of any organization, helping safeguard assets, support business continuity, and foster confidence for building occupants and stakeholders.

Effective security solutions not only deter threats and respond to emergencies, but also create environments where people feel safe and empowered. At CHA, our Life Safety and Security professionals deliver peace of mind through advanced, reliable, and innovative security solutions. Leveraging decades of experience, we design and implement systems that address the unique needs of each client and facility—never relying on a one-size-fits-all approach. Our team combines technical expertise with a deep understanding of operational requirements. Every solution is practical, cost-effective, and tailored to your environment.

CHA has been delivering life safety and security services for over 20 years, providing physical security design for projects ranging from under \$1 million to over \$1.1 billion. Our team has completed security assessments, CCTV, and access control system designs for a wide variety of public and private clients throughout the United States and Canada. We work with most major industry manufacturers and system types, and our in-house security technology demonstration room allows us to thoroughly vet products before deployment—making us true experts in CCTV and access control system design.

Our extensive experience with municipal and government entities reflects our commitment to responsible use of public funds, strict adherence to timelines, deliverables, and budgets. We aim to serve as an extension of your staff, bringing deep security expertise to help enhance the safety and security of your facility.
